SYNTHESIZED SCHOOL PROGRAM

ACADEMIC UNIT: Escuela Superior de Cómputo

ACADEMIC PROGRAM: Ingeniería en Sistemas Computacionales

LEARNING UNIT: Distributed DataBase. **LEVEL:** III

AIM OF THE LEARNING UNIT :

The student implements Distributed Database Systems through mainly design methodologies and architectural alternatives for distributed database.

CONTENTS:

- I. Distributed Systems.
- II. Distributed Database System.
- III. Distributed Database Architectures.
- IV. Design of a Distributed Database.

TEACHING PRINCIPLES:

The professor will apply a Projects-Based learning process, through analogical methods using analysis techniques, technical data, charts, cooperative presentation, exercise solving and the production of the learning evidences. Moreover, an autonomous learning will be encouraged by the development of a final project.

EVALUATION AND PASSING REQUIREMENTS

The program will evaluate the students in a continuous formative and summative way, which will lead into the completion of project portfolio. Some other assessing methods will be used, such as revisions, practical's, class participation, exercises, learning evidences and a final project.

Other means to pass this Unit Learning:

- Evaluation of acknowledges previously acquired, with base in the issues defined by the academy.
- Official recognition by either another IPN Academic Unit or by a National or International external Academic Institution besides IPN.

ACADEMIC PROGRAM: Ingeniería en Sistemas Computacionales

LATERAL OUTPUT: Analista Programador de Sistemas de Información

FORMATION AREA: Professional

MODALITY: Presence

LEARNING UNIT: Distributed DataBase.

TYPE OF LEARNING UNIT: Theoretical – Practical Optative.
VALIDITY: August 2011

LEVEL: III

CREDITS: 7.5 TEPIC – 4.39 SATCA

ACADEMIC AIM

Furthermore, this program to provide the knowledge to design distributed database systems, being caused the independent learning by means of the use of tools and methods; developing abilities to use different algorithms in the partitioning and data allocation for different sites at distributed database. It contributes to the debit profile reinforcing it integration of the knowledge of other Units of Learning to plan, to negotiate and to foment the analysis skills; designing and coordinating projects in the context of distributed systems and database topics. It dominates the practical and methodological principles, aspects for the construction of systems. Decision making, solution of problems, assertive communication, and creative, strategic thought. This unit has the units Data Base as antecedents.

AIM OF LEARNING UNIT:

The student implements Distributed Database Systems through mainly design methodologies and architectural alternatives for distributed database.

THEMATIC UNIT: I		UNIT OF COMPETENCE				TITLE: Distributed Systems	
The student relates issues of Distributed Systems through its characteristics.							
No.	CONTENTS	Teacher led-instruction HOURS		Autonomous Learning HOURS		REFERENCES KEY	
		T	P	T	P		
1.1	Introduction to Distributed Systems	0.5		1.5		7B	
1.1.1	Definition of a Distributed System.						
1.2	Issues of Distributed System.	2.5		3.0	1.5		
1.2.1	Openness.						
1.2.2	Transparency.						
1.2.3	Issues for Open System.						
1.2.4	Scalability						
1.3	Sorts of Distributed Systems.	2.0		3.0	1.5		
1.3.1	Distributed Computing System.						
1.3.2	Distributed Information System.						
1.3.3	Distributed Pervasive System.						
	Subtotals:	5.0	0.0	7.5	3.0		
TEACHING PRINCIPLES							
This Thematic Unit must begin with a framing of the course and the formation of teams. Will be Projects-Based learning strategy, trough analogical method, with the techniques of elaboration of charts, concept mapping, exhibition in team, practical and production of learning evidence and the accomplishment of a project proposal.							
LEARNING EVALUATION							
Diagnostic Test							
Project Portfolio:							
Charts5%							
Concept Mapping5%							
Cooperative Presentation10%							
Proposal of project20%							
Practical w/report20%							
Self-Evaluation Rubrics5%							
Cooperative Evaluation Rubrics5%							
Written Learning Evidence30%							

THEMATIC UNIT: II		TITLE: Distributed Database System				
UNIT OF COMPETENCE						
The student compares characteristics of a Distributed Database System through terminology of Distributed Processing.						
No.	CONTENTS	Teacher led-instruction HOURS		Autonomous Learning HOURS		REFERENCES KEY
		T	P	T	P	
2.1 2.1.1	Distributed Database Definition.	0.5		1.0		8C,1B, 4C
2.2 2.2.1 2.2.2	Distributed Database Management System Components. Advantages	0.5		1.0	1.0	
2.3	Distributed Processing and Distributed Databases.	0.5	0.5	1.0	1.0	
2.4	Distributed Database Transparency Features.	1.0	0.5	1.0	1.0	
2.5	Data Fragmentation.	1.5	0.5	1.0	1.0	
2.6	Data Replication.	0.5	0.5	1.0	1.0	
2.7	Data Allocation.	0.5		1.0	1.0	
	Subtotals:	5.0	2.0	7.5	6.0	
TEACHING PRINCIPLES						
Will be projects-Based learning strategy, trough analogical method, trough analogical method, with the techniques of elaboration of charts, concept mapping, exhibition in team, advance of the project, practical and production of learning evidences.						
LEARNING EVALUATION						
Project Portfolio: Report of Practicals 20% Concept Mapping 5% Cooperative Presentation 5% Advance of the Project 20% Self-Evaluation Rubrics 5% Cooperative Evaluation Rubrics 5% Writing Learning Evidence 40%
